DEAR BEEKEEPERS,

HAPPY HOLIDAYS AND A BLESSED NEW YEAR!!!

The 1989 officers of the Missouri State Beekeepers Association are:

President
Vice President
Program Chairman
Secretary
Treasurer
Editor

Bridgeton
Sibley
Florissant
Moberly
Lincoln
Ballwin

3-year term
2-year term
1-year term
At-Large Member

Charles Wills
Roger Nichols
Neal Bergman
Flernoy Jones

Springfield
Raytown
Kennett
Columbia

CONGRATULATIONS to the new and renewed officers!!!

Any members wishing to be considered for leadership at the state level, please contact one of the officers listed.

You might want a new Editor after the delays in getting this newsletter to you. At least I can report that honey sales are good this fall.

A special THANK YOU to Dr. Flernoy Jones who has served as our Vice President in charge of Programs since he came to UMO in 1976. It is a hard task to continue to put together the top quality programs that he has done for us over the past twelve years. Thanks Flernoy!!!

SPRING MEETING: MOBERLY, MO
March 10th and 11th, 1989

We have a dynamic meeting planned for March. Please make your reservations early so we won't run into problems that we encountered last October.

We are also considering having CERTIFIED PRIVATE APPLICATOR PESTICIDE training classes on Friday, March 10th. Please let Joe Solt or Larry Hensley know if you are interested in attending such a class. When Apistan strips become available for use against varroa mites, beekeepers will need to become certified, licensed, pesticide applicators.
MISSOURI STATE BEEKEEPER ASSOCIATION
FINANCIAL REPORT
OCTOBER 24, 1988

Cash in Bank -- 3-18-88 $7,576.51

Income:
- Dues $730.00
- Interest - C D & Checking acct 330.00
- Cook Book Sales 770.00
- 1988 State Fair 5,271.20
- Misc'l Income 5.00
Total Income 7,107.00

Expenses:
- State Meeting - Columbia $886.52
- Newsletters 677.66
- Cook Books 2,360.64
- Donations * 643.00
- Awards 48.99
- Honey Promotion 49.00
- Misc'l Expenses 16.02
- 1988 Fair Expense 5,038.33
- 1989 Fair Merchandise 150.00
- Postage Stamps 25.00
Total Expenses 9,895.16

Cash in Bank -- 10-24-88 $4,788.35

ASSETS:
- Checking Account $788.35
- C D -- Farmers Bank of Lincoln 4,000.00
- Inventory -- Cook Books 2,007.00
- Fair Merchandise 374.82
- Postage Stamps 24.00
Total Assets $7,194.17

* National Honey Board 50.00
American Honey Producers 100.00
American Beekeeping Federation 100.00
MO. State Fair Premiums 393.00
Hello fellow beekeepers. It's Winter time again and time for all of us to be preparing for next Spring. I usually get caught without having equipment ready for the swarm season. You would think I would learn. So, let me remind all of you (and myself), to get our equipment ready early so that we are not rushing around at the last minute trying to put frames and foundation together.

I was very happy to see such a large turn out at our Fall meeting in Mexico. I would like to personally thank the "Little Dixie" group for making the meeting a success. We had a few early problems with the meeting date and lodging facilities, but with the help of Dr. Flernoy Jones and Don Collop, everything seemed to end up OK. The program was very good and the only thing that I found lacking was time. There was not enough time to get all of the scheduled demonstrations in. Other than that, I think everyone had an enjoyable day.

Sharon Gibbons gave a report on the National Honey Board and what they are planning to do with marketing honey in the near future. If anyone has any questions about the National Honey Board, please direct them to Sharon Gibbons. I hope everyone has noticed, as I have, how many commercials on television are now mentioning honey. I think this is great and should help promote the use of honey in the ordinary household.

There are still some Honey Producers Directories available. These may be obtained by writing to me or to Jim Hausam. I have had some honey sales due to these Directories being picked up at the tourist centers. I think they are very beneficial.

An updated list of slides and tapes hopefully will appear in this issue. If we do not get it together in time, I will try to get a copy to all of the local organizations as soon as it is ready.

I would like to see each local association set up at least one beginning beekeeper program this year. This could be through your local school system, your local University Extention Office, The Boy Scouts or even just through your local association. We need to get some more young people interested in beekeeping.

Anyone who is interested in a Honey Queen Program, please let me know your feelings. The candidates must be young ladies who are free to do a lot of travelling around the State and who would have a Chaparone who would travel with them.

Remember till next time, EAT HONEY BECAUSE IT'S GOOD FOR YOU!

Sincerely,

Joe Solt - President Missouri State Beekeepers Association
Office of the Governor
State of Missouri

Proclamation

WHEREAS, Missouri has more than 1,000 beekeepers who serve agriculture through their bee pollination of fruits, vegetables, grain crops, and flowers; and

WHEREAS, Missouri has more than 10,000 colonies of bees producing more than 2 million pounds of honey; and

WHEREAS, the production and sale of Missouri honey and bees wax contribute in excess of $1 million to the state's economy; and

WHEREAS, the Missouri State Beekeepers Association, in cooperation with the Missouri Department of Agriculture, strives to provide high-quality honey to consumers and educate Missourians about the art of beekeeping;

NOW, THEREFORE, I, JOHN ASHCROFT, GOVERNOR OF THE STATE OF MISSOURI, do hereby proclaim November 1988 as

APICULTURE MONTH

In Missouri and urge every citizen of this state to recognize the contribution of Missouri beekeepers to our economy.

IN TESTIMONY WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Missouri, in the City of Jefferson, this 28th day of October, 1988.

Governor

[Signature]
Secretary of State
MISSOURI STATE BEEKEEPERS' ASSOCIATION  
Fall Meeting October 29, 1988  
Community Federal Building  
Mexico, Missouri

The meeting was called to order by President Joe Solt at 3:00 p.m. Officers were introduced.

The minutes of the Spring meeting were read by the Secretary. Larry Hensley moved for approval, Roger Nichols seconded. Motion was approved.

Treasurer Jim Hausam presented his report, as attached. Bob Fink moved for approval, seconded by Maynard Page. Motion was approved.

As there was no old business to discuss, the meeting moved ahead to new business.

Motions were presented as made and seconded by the Executive Board at their meeting the previous evening:

1) That the State Association order more of the honey producers' brochures for the same type of promotions as in 1988. Motion was made by Francis Scheidegger, seconded by Bob Campbell. After discussion it was decided to change the recipes that appear in the brochure and to leave the date off the front of future printings. Motion passed.

2) That the State Association purchase a video tape on the JZ's EZ's honey operation to be included in the Association's library. Glen Davis made the motion, seconded by Don Collop. Motion passed.

3) Joe Franska is trying to get the Africanized honeybee added to the state agriculture law as a pest. Glen Davis made a motion that the Association vote to support Joe in this effort, Larry Hensley seconded. Motion passed.

4) Bob Campbell made a motion to donate the same amount of money to the national associations, the Honey Board, and the State Fair as was donated in 1988. Francis Scheidegger seconded. Motion was passed by the Executive Board. The amounts were:

- National Honey Board $50
- American Honey Producers $100
- Am. Beekeeping Federation $100
- State Fair $393

Nominating Chairman Joe Solt presented a slate of officers as follows:

- President: Joe Solt
- Vice President: Mike Vanarsdale
- Program Chairman: Larry Hensley
- Secretary: Jim Thaxter
- Treasurer: Jim Hausam
Jim Stokes made a motion that the slate of officers be elected as presented. Roger Nichols seconded. Motion passed. Continuing board members are Roger Nichols, two years, and Neal Bergman, one year.

Joe Francka reported that the AgriMissouri program is still providing marketing support for Missouri's agricultural products. They have a cost/share program for this.

Larry Hensley has a mailing list of newspapers and radio stations in the state for sending information regarding the State Association's activities. He would like a report of papers and stations that he may not have on his list.

Neal Bergman reported that the national associations are both having their meetings in the Midwest this year and urged members to attend and support them.

Joe Salt feels there may be some interest in starting a Honey Queen program in Missouri. He would like anyone interested in running such a program to contact him.

Don Collop made a motion that the by-laws be amended to allow having the Spring Meeting at a central location instead of at the University in Columbia. Mrs. John Odneal seconded. Motion passed.

Jim Stokes made a motion that the 1989 Spring Meeting be moved from the University due to scheduling conflicts with sporting activities at the University. Glen Davis seconded. Motion passed.

Larry Hensley moved for adjournment. Francis Scheidegger seconded. Motion passed.

Respectfully submitted,

Jim Thaxter, Secretary
MISSOURI LOCAL BEEKEEPING ASSOCIATIONS

18. SEMO HONEY PRODUCERS ASSOCIATION (Poplar Bluff Area)
    Glen Thornton, Rt. 6, Box 270-U, Poplar Bluff, Mo 63901

19. BUSHWACKERS BEEKEEPING ASSOCIATION (Nevada Area)
    Charles Hinckley, Box 442, Nevada, Mo 64772

PLEASE WRITE TO THE PERSON CLOSEST TO YOU FOR INFORMATION ON BEEKEEPING IN YOUR AREA OR WRITE TO THE STATE ASSOCIATION IF THERE IS NO ONE NEAR YOU.

YOU WILL FIND THAT MISSOURI BEEKEEPERS ARE VERY HELPFUL TO NEW HOBBIEST BEEKEEPERS. YOU CAN START WITH JUST ONE COLONY OF BEES AND HAVE ENOUGH HONEY FOR YOURSELF AND FRIENDS. PLUS A VERY EDUCATIONAL AND ENJOYABLE HOBBY.
Welcome to the 22nd Annual Governor’s Conference on Agriculture

Sponsored by The Governor’s Advisory Council on Agriculture and the Missouri Department of Agriculture

Representing Missouri State Beekeepers Assn., this conference was attended by President Joe Solt and his wife Yvonne, along with myself and my husband John. It was held at the Lodge of the Four Seasons at Lake Ozark, Missouri from December 11-13. Other members of MSBA attending were Dr. Flernoy Jones, Ray Nabors, and hard at work was Joe Franck.

All the large agricultural fields were represented from cotton, soybean, and corn to pigs, sheep, cattle, and dairy industries and farmers. Charles E. Kruse, Director of the Missouri Department of Agriculture officiated. We heard from Senator Kit Bond about the 1990 Farm Bill, and the direction agriculture was taking. A lot of emphasis was put on the family farm and how to survive these troubled times. Fear of a return to the "Dust Bowl Days" was re-enacted in a one-act play called "Planting in the Dust". It seems that our generation is cutting down the trees to plant more crops, and forgetting about soil conservation.

This conference opened with a "Taste of Agri-Missouri" Buffet. Food commodity organization including the Missouri State Beekeeping Assn., cooked and served foods that are produced in Missouri. We enjoyed everything from Chevron Chili (goat) to "Moon-And-Sun-Eggs"; along with catfish, trout, beef-on-skewer, heavenly blueberry desserts, and black walnuts over ice cream. One food group notably missing was vegetables. We were all wondering if Missouri produced any at all! Honeybees filled with honey were present on all the tables at dinner Sunday and breakfast Monday. After that they seemed to disappear. Four kinds of cookies made with honey were on trays during the coffee breaks Monday and Tuesday, but there was not a sign letting people know that they were made with honey.

The conference attendance was 1008 people. Joe and I were amazed at the large group of people attending an event in December, two weeks before Christmas. The conference is open to anyone interested in agriculture and who has a couple of hundred dollars to spend on food and lodging. This year's meeting focused on alternative agriculture under which beekeeping is classified as— at least by all the corn and soybean farmers. (We seemed to sit with a lot of these people at dinner and most of them seemed surprised that we could make money at selling honey).
Earnest Bohner talked about raising berries and shiitake mushrooms in southwest Missouri. Dan and Vondel Rush told of their success with "Hillbilly Bean Soup", and we were delighted to find beekeeping represented by Robert and Janice Thompson of Brunswick, Mo. Bob told of moving from Kansas City to the farm and of their early struggles to make a living from honeybees. He said that he doesn't know many farmers who would build a house over their livestock operation as he has over his beekeeping operation. Their business, Thompson's Honey Bee Acres, annually produces 8,000 gallons of honey from 700 bee hives scattered throughout north central Missouri. Bob and Janice do all of the work themselves. Janice showed the crowded room what a real beekeeper looks like, as she put on her bee suit, veil and gloves made from 100% cotton and cowhide. She asked their industries to support American Honey as we support their industries.

I commend the Department of Agriculture for such fine programs, and for including beekeeping in their agenda. The addition gave our area of agriculture some visibility at a conference attended by many diverse farming groups. I am glad that I attended as it gave me ideas of how Missouri Beekeepers could become a bigger part of an agricultural conference of this size. Until we reach out to increase the consumption of honey, our sales of honey will not increase. What a better place to start, than with the farming community already tuned in to buy AMERICAN!

Sharon Gibbons, Editor

---

Honey Recipe

This month's honey recipe comes from our secretary, Elizabeth Latham. Thanks, Liz.

Honey-Curry Chicken
2 oz. butter/margarine
1/2 C. Honey
1/4 C. prepared mustard
1 t. salt
1 t. curry powder
3 lbs. broiler or fryer, cut up

Melt butter and blend in rest of ingredients. Pour over chicken pieces and bake at 375 F for one hour.

From: Rhode Island Beekeepers Assn.
Bias?

I had the good fortune of learning to keep bees from a special person. He treated me as an equal, although I am a woman. My beekeeper friends and associates have carried this tradition on. I have never felt prejudice or bias because of my gender.

Over the years I have found that the learning process is continuous. I have had to grapple with many problems—one of which has been how to lift and handle heavy supers. This problem "hit home" in a particularly meaningful way when a teenage girl approached me at our local 4-H Fair. She wanted to keep bees. Her mother, who was with her, had a number of questions about beekeeping. One of these had to do with the amount of weight involved in lifting supers. She did not expect that anyone in the family would be willing to help her if need be. This got me thinking about all the technical discussions I’ve had with fellow beekeepers concerning lifting supers as well as the articles presented in Gleanings in Bee Culture and other beekeeping publications.

When I first thought about writing this, I planned to suggest that you publish more articles by women beekeepers concerning their need for technical help specific to their problems. Perhaps, a column written by a woman, or a number of women, concerning beekeeping from their point of view would have special value. I find that I do have a special connection with women in beekeeping. I would like to see such a column appear in Gleanings in Bee Culture and would also like to correspond with other women. However, I have come to value and respect my fellow beekeepers as an unbiased lot who have struggled with and who have had to solve technical issues about lifting supers and the like.

I would appreciate letters from anyone who would like to write about their own special experiences and techniques in lifting and handling heavy supers, or any other aspect about this.

Kay Nathanson
P.O. Box 384
Putnam Valley, New York 10579

Editor’s Note: Readers, is there this kind of interest?

Yes, More!

I read with interest the letter from Kay Nathanson in your October, 1988 issue.

Yes! I think that articles written by women beekeepers or those who market the honey products would be both timely and interesting. In many of the bee Journals, the only females who are mentioned are either the coxswain or the Queens. The same men write the articles for every issue. (I’m not saying those men don’t write well or interesting papers...) Are there no women who are actively involved in either raising bees or selling honey?

I am certain that some of the techniques I employ in my bee management are different than some men’s because of my size—I can not lift a full depth super with honey. I believe that my methods of marketing honey are different from the men in my area—but then I don’t know of too many other women in the business so it’s hard to gauge mine versus theirs.

Whether there is a truly “best” way of handling bees and if it’s related to gender may ultimately be insignificant. Beekeeping is as unique as the individual who’s engaged in the craft. However, some articles by women would be interesting grist for the mill.

Equality Questioned, Again

I am referring to Kay Nathanson’s letter in the October 1988 issue who is delighted with her status as a beekeeping equal, yet wants special treatment for being a female. Hauling a full deep super is a problem for senior citizens, and for people who have had strokes or arthritis or a similar illness that impairs their physical ability. Does she have two hives or two thousand? Is she using shallow supers? Has she tried the Langstroth handle on supers? If her hives are not on level ground, can she remove one frame at a time and carry it to level ground? We advertise two wheeled carts for sale, and hydraulic lifts, or why not hire a high school student? Does she belong to a local bee club?

With so little information provided about her problem, can we solve it on a national level or is it better handled locally?

Jim Stokes
5617 Independence Road
St. Charles, MO 63303

Kim Flottum, Editor
Gleanings in Bee Culture
623 West Liberty Street
P.O. Box 706
Medina, Ohio 44258

Dear Jim,

Your headline “Equality Questioned, Again” over my letter was most interesting. The thrust of my letter was meant to be that some problems are better solved at the local level, rather than the national.

The 1980 ABC of Bee Culture, A.I. Root, Editor, featured Mrs. Lucinda Harrison as a beekeeper of note, and contained her biography. In 1980 each week we found Dr. C.C. Miller, Prof. A.J. Cook, G.M. Doolittle, G.W. Deinzer, Gandt & Son, and Mrs. L. Harrison, among others, answering beekeeping questions for readers. (Both ABC and ABC were weekly magazines in those days.) I read a year of her comments and found her to be an excellent beekeeper, and an interesting writer. About 10 women total were writing articles on items of interest to beekeepers, such as temperatures inside the hive, methods of wintering, etc.

Reading the current issue of Gleanings in Bee Culture magazine contents listing, I find women writing cooling columns, making crossword puzzles, and very rarely, authoring a beekeeping article. And you blame us for finding female beekeepers who write, or do you consider cooking columns the appropriate subject for female authors? Based on available evidence, you seem to be a closet male chauvinist editor.

Sincerely,

James A. Stokes

Sharon Gibson, Editor
Missouri State Beekeepers Newsletter

F.S. Merry Christmas and Happy New Year to all.

This comment was taken from an article written by Sue Hubbell for the New Yorker Magazine on May 9, 1988.

I don’t know why so few women keep bees. Among commercial beekeepers—those who have three hundred hives or more and make their living from them—women are rare. I know I am the only one in my area, and I may be the only one in Missouri. Even among people who keep just a small number of hives, few are women, although there are a number of women entomologists who specialize in bees and work for the bee-research laboratories. I should like to think that we have changed since the days of Cynthia Linswijk, a woman beekeeper who in 1875 advised women beekeepers against making their own frames. She wrote:

Let her spare her gentle fingers for finer uses—as sewing on of buttons—and buy the frames. One of the thorns in the path of the woman who undertakes to master the theory and practice of beekeeping is her lack of natural or acquired ability to drive a nail straight, to use a saw with safety to the implement, or a sharp knife with safety to herself. The gifted few of whom this may not be true constitute so small a fractional part of woman kind that they may be regarded, properly, as exceptions proving the rule. And the woman who begins to keep bees without giving her attention directed to this matter is in danger of suffering from vexation of spirit, and wounded fingers, many times during the course of her novitiate.

AFRICANIZED HONEY BEE SWARMS IN FLORIDA

A swarm of Africanized honey bees was collected on a ship from Guatemala in Tampa, Florida, on October 31, 1988. This was the third swarm of Africanized honey bees found in Florida since September 26, 1988. Honey bee survey and detection efforts are continuing in the Port Everglades, Florida, area. Since a suspected AHB swarm flew away on October 20, 1988, ten feral colonies have been located and submitted for identification. Eradication procedures are being implemented. (APHIS PPQ Kilites for Week ending November 4, 1988)
Where Were You!!

October 29th, 1988

Some of us were at the Missouri State Beekeepers Meeting in Mexico, Mo. Come join us in Missouri, March 11th, 1989.

SLIDE AND TAPE LIBRARY UPDATE

SPECIAL NOTES ABOUT USING OUR LIBRARY

1. ALL ITEMS MARKED WITH (*) ARE ON ORDER AND NOT IN OUR HANDS AS YET. WE WILL LET YOU KNOW WHEN THESE ARE AVAILABLE.

2. ORDER FROM: JOHN J. HARTMAN
   RT. 5, BOX 714
   3353 FROG HOLLOW ROAD
   JEFFERSON CITY, MO 65109
   PHONE: (514) 636-6753 DO NOT CALL AFTER 10:00 PM

3. ORDER AT LEAST ONE WEEK IN ADVANCE (ALLOW MORE TIME IF POSSIBLE)

4. PLEASE TRY TO USE UPS TO RETURN THE MATERIAL IF POSSIBLE. IF YOU MUST USE THE POSTAL SYSTEM, BE SURE TO INSURE SLIDE SETS FOR A MINIMUM OF $1.00 PER SLIDE AND VIDEO CASSETTES FOR A MINIMUM OF $75.00.
SLIDES BY THE A.I. ROOT COMPANY

Set 1 - HONEYBEES - (67 slides). An introduction to the honeybee; showing the development and describing the behavior and activities which is basic to the understanding of this amazing animal. For beginning beekeepers or anyone interested in learning more about the honeybee.

Set 2 - BEGINNING BEEKEEPING - (73 slides). This set of slides illustrates and describes the various steps necessary in beginning beekeeping. Every other phase of beekeeping during the season is explained that will interest both beekeeper and non-beekeeper alike.

Set 3 - THE HONEY HARVEST - (73 slides). Covers fully the various steps of honey removal, extraction and processing. Shows you the basic steps that can make the honey harvest easier by illustration and description.

Set 4 - NECTAR AND POLLEN PLANTS - (80 Slides). A set of unique slides with a written script and a tape recording describing the honey plants commonly found east of the Mississippi River. Your sources of pollen and nectar become less of a mystery with this slide set. Excellent for instruction and enjoyment at meetings and in the classroom.

1/2" VHS Video Tapes

QUEEN REARING by Dr. James Tew - (75 minutes)
AN INTRODUCTION TO BEEKEEPING by Ed Weiss - (58 minutes)
AFRICANIZED BEE - (15 minutes)
VARROA JACOBSONI - A NEW PARASITE IN THE BEE POPULATION (46 minutes)
VARROA JACOBSONI - BIOLOGY, RESEARCH, CONTROL (32 minutes)

16MM FILMS

BEE MANAGEMENT IN TWO REELS
LARGE REEL - FALL AND WINTER (10 minutes)
LATE WINTER AND EARLY SPRING (10 minutes)

SMALL REEL - HONEY HANDLING (17 MINUTES)

NEW AND ON ORDER

THE MONK AND THE HONEYBEE - The story of Brother Adam of Buckfast Abby. This will be a 90 minute VHS cassette and sounds like it will be very interesting.
BEEKEEPING ACTIVITIES

The Last Apple:
Beekeeping in the 1980's
Dr. Larry Connor, B.S. 1965 - 1985

Under-pollination occurs when there are too few bees to pollinate agricultural crops and flowers which become food for wildlife. Now, you can use this set to tell your audience about the problems and threats facing the U.S. beekeeping industry, and how — if certain problems are not solved — the result may be widespread under-pollination.

[No. 1] - 60 Slides/Script/cassette tape, suitable for older youth, all adults.

Very popular set

Introductory Beekeeping
Dr. Larry Connor, B.S. 1975 — Revised 1982

This set shows the queen, drone and worker honey bee, queen cell, beeswax, honey, colony manipulations, American foulbrood, standard hive equipment, smoker, hive tools, and flower pollination. Use for both beekeeping and non-beekeeper groups, classroom situations, and as 'filler slides' for your other talks.

[No. 2] - 20 Slides/Notes, ideal for someone who need slides for a presentation which must include a variety of beekeeping subjects.

Popular with students and non-beekeeper groups

The Honey Bee and Pollination

The Honey Bee and Pollination program uses pollination as an underlying thread to stress the value of honey bees in modern life while showing basic beekeeping activities. See how bees produce honey, gather pollen, and reproduce by swarming. There are many excellent close-up photographs. Don't miss this set. It is a tremendous value.

[No. 6] - 81 slides/script and pre-recorded standard cassette tape.

Clearly Illustrated steps

Extracting Honey
Roy Williamson, photographer, Kent, England — 1977

Developed for the training of new and hobby beekeepers, this set shows how to use a simple tangential extractor. Knife uncapper, settling tank and how to bottle liquid honey. Problems with honey crystallization are covered, and a few simple comments are made about making crystallized honey. Developed for hobby beekeepers everywhere. Extracting Honey very highly for use with new and hobby beekeeping groups.

Swarm!

A real swarm is discovered, and the beekeepers place it into a hive. A review of the activities used in having the swarm made. This swarm has three queens, a fact scientists now think is rather frequent. Use this for your beginner courses or in the classroom for students of all ages.

[No. 11] - 28 Slides and Notes.

Hive Types and Other Equipment

Dr. John Free and U.H. Williams — 1977

There are many pieces of beekeeping equipment to learn for the new beekeeper. Added to this confusion is the difference found in various parts of the world. This set shows popular beekeeping equipment from various parts of the world as shown in clear photographs. This set contains international hives of several types.

[No. 28] - 15 Slides/Notes.
BEES AND SCIENCE

101. The Bee Tree: The Natural Home of the Honey Bee
Dr. Thomas Seeley, Cornell University — 1984

The results of years of research and careful analysis of natural bee trees in Northeastern United States, Dr. Seeley presents a comprehensive picture of the home of the European honey bee—the bee tree. Learn how bees utilize their comb with drone comb, different flowers, comb size, propolis, and many other fascinating facts.

Many beekeepers have found that the study of the natural home of the honey bee has been extremely useful in understanding the biology of the bees they keep. Use in coordination with Dr. Seeley's Honeybee Ecology ($15.95(b), $40.50(c))

[No. 101] — 20 Slides and Notes.

102. The Africanized Bee Situation in the Americas
Dr. Dewey M. Carnroy, University of Delaware — 1984

This presentation reviews the introduction, spread, and changes to beekeeping in areas of Central America as the Africanized honey bee has moved into them. Beekeeping continues as a modified form, with isolated locations, separate hive stands, and other changes. Africanized bees are expected to reach the US border as a widespread invasion as early as 1989. There are many questions, and few answers to this vitally important subject.

[No. 102] — 30 Slides and Notes.

103. Coping with the Africanized Bee — Updated status from Panama
Dr. Dewey M. Carnroy, University of Delaware — 1986

In this presentation and for 1988, Dr. Carnroy examines the changes which have taken place in Panama since the Africanized bee presence has been completed. Beekeeping has changed, but has not disappeared.

[No. 103] — about 26 Slides and Notes.

BEE PROBLEMS

Strongly advised for all instructors and clubs

17. Honey Bee Diseases and Pests
Dr. Larry Connors, Beekeeping Education Service — 1982

Diseases and pests are a reality of beekeeping, and every beekeeper must be able to recognize the common bee diseases and the varroa mite! This shows the classic diseases: American foulbrood, European foulbrood, chalk brood, sacbrood, phorrosos, wax mites, varroa mite, and more. This is essential for honey bee keepers.

Every bee club or association should obtain this set and use it to train new and hobby beekeepers. This is one of the best selling sets among beekeeping associations. After seeing this set one foreign beekeeping organization purchased 50 sets — one for each of its bee clubs.

[No. 77] — 50 slides/script/notes, tape.

18. Honey Bees and Pesticides
Dr. Car Johnson, Washington State University — 1978

Every year, millions of honey bees are killed by pesticides, and many more are weakened. This seriously threatens the pollination security of our country. The federal Environmental Protection Agency funded the development of this comprehensive video on pest control to educate growers, pesticide applicators, beekeepers, and the general public.

This is the ideal companion set for the soon-to-be-published book on Pollinator Protection — write for information.

[No. 181] — 80 Slides and Detailed Notes.
Queen Production, Mating and Management
Larry Connor, Beekeeping Education Service - 1982

There are several ways to produce honey bee queens, and watching this set of slides will provide the viewer with an enormous amount of detail into the queen rearing and mating process. Seven years of careful photography on site in many commercial operations in both the north and south resulted in this comprehensive 80-slide set showing several methods of grafting, cell starting, cell finishing, queen holding, and mating. Dr. Connor operated a commercial queen-rearing, mass instrumental insemination program in Florida for a number of years. These methods are the distillation of his extensive experience with queen rearing and using queens.

Added are comments on queen use which make this the most comprehensive program of its sort available on queen rearing outside of our book collection.

[No. 19] - 80 Slides/Script/Cassette tape,

An extremely useful set for bee schools
Increasing Colony Numbers
Dr. Larry Connor, Beekeeping Education Service - 1983

This program reviews standard methods of using swarms, package bees, nuc split, and nucleus colonies. It also shows how to use a double screen and other special equipment.

[No. 21] - 80 Slides/Script/Cassette Tape,

Step-by-step instructions
Feeding Honey Bee Colonies
Dr. Clarence Collins, Extension Entomologist, The Pennsylvania State University and Dr. Larry Connor, Beekeeping Education Service - 1983

This set clearly shows how to feed liquid and dry sugar using a wide variety of popular methods and styles of feeders.

[No. 22] - 42 Slides/Detailed Script,

BEE BIOLOGY AND BEHAVIOR

Life History and Activities of the Honey Bee
Roy Williamson, photographer-beekeeper, England - 1973

This ideal starter set if you offer classes in schools, nature centers, or at the local bee club. It shows the castes (queen, queen cells, workers, worker development, drone, drone cells), the activities of the queen, drone development, worker duties; honey, pollen, and propolis handling and much more. This set is a marvel in microphotography, and I use it extensively in my own teaching.

[No. 15] - 42 Slides and Notes,

The Amazing World of the Honey Bee
Roy Williamson, photographer-beekeeper, England - 1984

Here is a superior set of slides showing the most intimate aspects of bee behavior: wax secretion, comb building, honey processing, pollen packing, propolis handling, queen and worker development and more. Beekeeper-photographer Williams likened this set to a dictionary to the size of a bee and watching the most private activities of the colony.

Combined with set No. 15 - Life History and Activities of the Honey Bee, you will have the most complete set of bee biology and behavior slides possible. But this set may be used by itself with great satisfaction.

NEWS RELEASE

AMERICAN BEEKEEPING FEDERATION
Contact: Troy Fore -- 912-627-8447
Frank Robinson -- 904-332-1124

For Immediate Release/Use in December or January issues prior to convention opening on January 20, 1988.

ARS ADMINISTRATOR TO BE KEYNOTE SPEAKER AT FEDERATION CONVENTION

Dr. R.D. Florman, administrator of the U.S. Department of Agriculture's Agricultural Research Service (ARS), will bring the keynote address at the 45th annual convention of the American Beekeeping Federation, set for Jan. 20-25 in Indianapolis, Ind.

Dr. Florman was named administrator of ARS in April, capping a 27-year career with USDA. After growing up on a dairy farm in Utah, he took degrees in animal science at Utah State and University of Minnesota. He has done extensive work in genetics and dairy herd improvement. Immediately prior to assuming duties as ARS administrator, Dr. Florman spent four years as head of the Department of Animal, Dairy, and Veterinary Sciences at Utah State.

The Federation convention will convene on Saturday, Jan. 21, for the opening session and keynote address, following a day of officers and directors meetings on Jan. 20. The site will be the Westin Hotel, which will open two weeks before the Federation convention.

Convention presentations have been arranged to appeal to all facets of the beekeeping industry -- from queen breeder to honey producer to honey packer -- from the backyard hobbyist to the migratory beekeeper. Subjects cover beekeeping topics from A (acarosis, caused by tracheal mites) to at least W (worldwide sales of U.S. honey) and most in between.

Federation convention goers like to mix fun in with their business. Social activities planned for Indianapolis include those connected with the American Honey Queen program: a reception and Queens' Bee Bowl on
Saturday evening and the coronation ball on Tuesday evening following
the annual banquet. On Sunday, there will be a bus tour to Conner
Prairie Pioneer Village on the outskirts of Indianapolis. After hearing
from a "circuit-riding preacher," the group will tour the circa-1836
village and dine in Governor Noble's Eating Place. On the trip back
to the hotel, the beekeepers will have the option of stopping by
the Indianapolis Motor Speedway, where they can visit the "Gasoline
Alley" museum and take a spin around the track, Sunday evening, tall
tales will be spun at the "Bullshooter's Championship."

The Federation convention will feature, as usual, a trade show
with exhibits of the latest the suppliers have to offer, the American
Honey Show with the finest examples of honey from around the country,
and a luncheon meeting of the Ladies Auxiliary.

A preconvention mailing has been sent to all Federation members.
Others wishing hotel and pre-registration information should contact
the American Beekeeping Federation, P.O. Box 1038, Jesup, GA 31545, ph.
912-427-8447.

PLEASE HELP US INCREASE OUR LIST OF NEWSPAPERS AND RADIO STATIONS FOR PRESS RELEASES ABOUT OUR STATE MEETINGS. SEND ME THE NAME AND ADDRESS OF THE MAJOR (MOST LISTEN TO) RADIO STATION IN YOUR TOWN SO THAT WE CAN SEND THEM THE ANNOUNCEMENT ABOUT OUR MEETING. WE HAVE ALMOST EVERY NEWSPAPER IN THE STATE BUT VERY FEW RADIO STATIONS. YOU ARE WELCOME TO SEND THE NAME OF YOUR NEWSPAPERS ALSO. THE MORE THE BETTER.

LARRY HENSLEY
13520 OLD JAMESTOWN ROAD
FLORISSANT, MO. 63033
What is Honey?

Much more than it seems to be, I think.

Aristotle called it the nectar of the gods. And 2400 years ago the prophet Isaiah said the Messiah would come eating honey so he might grow up knowing what was good.

Honey is certainly more than a simple jar sitting solidly on a grocery shelf.

It is the soul of a field of flowers.

It is a child with a sticky piece of toast learning that suddenly fingers taste good.

It is an unforgettable bear named Pooh pursuing a sweet obsession in a book a long time ago.

It is going away gift for a Pharaoh on a journey into the hereafter—as everlasting as the gold ornaments that accompanied it.

Honey is Sunday breakfast with funnies and waffles and plates you'll clean up later.

It's the only justification you can think of for sweet potatoes—and still a good reason to lick your knife (when you're alone).

It's school days and paper sacks and thank goodness it's not egg salad again.

In a world of fastfoods and non-dairy creamer and artificial ingredients, it's the little plastic cup full of gold that somehow got overlooked when "progress" passed through.

Honey is the chapter they forgot to write in the book called "In Pursuit of Excellence." Yet its making is a marvelous work of nature that makes the best factories of man look disorganized, lazy and of very little real value.

Honey is the glow of beauty on the faces of striking women.

The touch of healing in a thousand remedies around the earth.

It is sweetness and life and its golden touch enhances our days from their beginning to the very end. And when at last the years have streaked our hair with gray and phrases like "darling" and "lambie pie" don't fit anymore, it is the one expression of pure affection that never wears out between us, "Honey, I love you."

Because honey is indeed synonymous with love itself. A beautiful blessing created in a mysterious way.

An expression of love and a special gift to man.

MERRY CHRISTMAS
FROM THE
NATIONAL HONEY BOARD

FAX (303) 776-1177
THE MEETING WILL BE HELD AT A BUILDING OWNED BY THE RAMADA INN. THE RAMADA INN IS AT THE JUNCTION OF U.S. 63 AND 24. THE MEETING WILL BE HELD AT THE HEIGHTS BUILDING APPROXIMATELY 3.5 MILES SOUTH ON 63 HWY 1ST LEFT PAST RT. H INTERSECTION.
IF COMING FROM SOUTH ITS APPROXIMATLEY 3.5 MILES BEFORE YOU GET TO MOBERLY.
Missouri State Beekeepers Assoc. Moberly, Mo.

* Great Speaker
Dr. James E. Tew

* Great Facilities

* Great Location

* Great Buffet Lunch

This Will Be A G-R-E-A-T Meeting on 3-11-89
Bee a Good Beekeeper and Bee There
A NEW LOCATION AND A NEW CONCEPT IS BEING USED FOR THE FIRST TIME FOR THE SPRING MEETING OF THE MISSOURI STATE BEEKEEPERS ASSOCIATION.

WE ARE MAKING SOME CHANGES SO THAT THE MEETING WILL BE MORE EFFICIENT AND MORE CONVENIENT FOR YOU TO ATTEND. WE ARE GETTING A GOOD DEAL ON LODGING, BUFFET LUNCH, AND MEETING FACILITIES, SO IT IS IMPORTANT THAT EVERYONE TAKE ADVANTAGE OF THE LODGING AND BUFFET LUNCH FOR US TO GET THIS SPECIAL DEAL.

1. THE MEETING WILL BE HELD AT A CENTRALLY LOCATED SITE OTHER THAN THE UNIVERSITY OF MISSOURI CAMPUS AT COLUMBIA. THE ADVANTAGE OF THIS IS THAT WE ARE NOT LIMITED TO ONE DATE, THEREFORE WE HAVE GREATER FLEXIBILITY WHEN RECRUITING A NATIONAL KNOWN SPEAKER. ANOTHER ADVANTAGE IS THAT WE CAN INVITE DEALERS OF BEEKEEPING EQUIPMENT TO ATTEND AND SETUP A DISPLAY OF THEIR MERCHANDISE. EVERYONE ENJOYS THIS FACET OF THE MEETING VERY MUCH.

2. THE MEETING WILL BE HELD AT THE RAMADA INN CONFERENCE CENTER, WHICH IS THE SAME HOTEL WE WILL BE USING FOR OUR LODGING ON FRIDAY NIGHT, MARCH 10, 1989. THE CONFERENCE CENTER IS ONLY THREE MILES DOWN THE ROAD FROM THE HOTEL ON HWY. 63. WE HAVE VERY GOOD RATES: (1 PERSON) (2 PEOPLE)
   QUEEN $37.18 $45.43
   DOUBLE $39.38 $45.68

THE RAMADA INN HAS BEEN COMPLETELY REMODELED AND HAS 99 ROOMS. ONE HALF OF THE ROOMS ARE BRAND NEW AND THE OTHER HALF HAVE BEEN COMPLETELY REMODELED.

YOU MUST MAKE YOUR RESERVATIONS EARLY TO GUARANTEE THAT YOU HAVE A ROOM. THE BEST WAY TO GET THE MOST ENJOYMENT FROM THE MEETING IS TO COME IN ON FRIDAY NIGHT SO THAT YOU WILL BE BRIGHT AND FRESH SATURDAY MORNING. SINCE THE LODGING, MEETING, AND BUFFET LUNCH ARE AT THE SAME FACILITIES, VERY LITTLE TRAVELING IS REQUIRED.

IT IS VERY IMPORTANT THAT YOU IDENTIFY YOURSELF AS A ATTENDEE OF THE MISSOURI STATE BEEKEEPERS MEETING WHEN SETTING YOUR RESERVATION. CALL (816) 263-8840.

3. A BUFFET LUNCH WILL BE SERVED IN THE ROOM ADJACENT TO OUR MEETING ROOM. THE COST IS $7.50 PER PERSON AND ADVANCE RESERVATIONS ARE REQUIRED. PLEASE COMPLETE THE ENCLOSED FORM AND MAIL AS EARLY AS POSSIBLE.

THE BUFFET LUNCH IS BEING PROVIDED SO THAT YOU WILL NOT HAVE TO LEAVE THE BUILDING DURING LUNCH. THIS PROVIDES US WITH MORE FREE TIME TO VISIT THE VENDOR DISPLAYS AND OUR FELLOW BEEKEEPERS, WHICH IS THE MAIN PURPOSE OF THE MEETING. PLEASE TAKE ADVANTAGE OF THIS GREAT OPPORTUNITY AND SEND US YOUR REGISTRATION TODAY. THE MENU IS AS FOLLOWS: TOSSED SALAD, POTATO SALAD, FRIED CHICKEN, SPAGHETTI O'BRIEN, LONG GRAIN WILD RICE, HOT ROLLS & BUTTER, COFFEE & TEA, AND APPLE CRISP.
MISSOURI STATE BEEKEEPERS ASSOCIATION
SPRING MEETING - MARCH 11, 1989
MOBERLY, MO.

A.M.
8:30 - 9:00  REGISTRATION  (COFFEE AND ROLLS PROVIDED)
9:00 - 9:05  MEETING CALLED TO ORDER - MR. JOSEPH SOLT, PRESIDENT
9:05 - 9:15  INVOCATION & WELCOME
9:15 - 10:15  AFRICANIZED HONEY BEE UPDATE - DR. JAMES E. TEW, OHIOS STATE UNIVERSITY
10:15 - 10:45  BREAK
10:45 - 11:45  THE BEEKEEPER AND THE LAW - MR. KENNETH OTT, ATTORNEY AT LAW, PEORIA, ILL.
11:45 - 1:00  BUFFET LUNCH (SERVED IN ADJACENT ROOM)

P.M.
1:00 - 1:30  ARTIFICIAL INSEMINATION IN QUEEN REARING - VIDEO BY DR. JAMES E. TEW, OHIOS STATE UNIVERSITY
